

## Cooperation interbil

Windhagen, February 2018

Nippon Kornmeyer Carbon Group, Windhagen Germany, announces the newly established cooperation with interbil – Ingeniería Térmica Bilbao, S.L., as agent for specialty graphite in Spain and Portugal.

Areas of interbil activities: Design and commercialization of products for furnaces, refractory and insulating materials, heating elements, burners, instruments and equipment for control, regulating and supervising systems, technical assistance and maintenance services as well as engineering support related to thermal processes, all type of furnaces, systems for control and regulation of industrial processes.

“Due to the longtime experience with processes and requirements in the field of high temperature and heat treatment industries, we have with interbil an ideal partner to get a comprehensive understanding of customer needs which allows us to provide customized solutions and to strengthen the relationship with both, existing and new customers” says Torsten Kornmeyer, Managing Director of Nippon Kornmeyer Carbon Group. “Furthermore, interbil will be able to keep stock at Bilbao facilities for important spare parts and thus is able to respond to sudden customer needs.”

“With Nippon Kornmeyer we can broaden significantly our services and spare parts capabilities to our Spanish and Portuguese customers” says interbil General Manager Jon Barañano, “we continue to support them in the wide field of high temperature applications and to reduce their numbers of suppliers.”
